SOLUTIONS THAT WORK

Airmaster offers the largest line of air moving equipment in North America. Not only the most products, but the best circulation, ventilation and heating solutions. We're known around the world for our reliability, reputation for keeping people comfortable and quality you can feel.

We design, manufacture and warehouse our products at our Clarklake, Michigan location, where we have a full fabrication facility, along with a knowledgeable engineering and technical staff. We also maintain stocking warehouses across the country to meet the needs of our industrial, electrical and HVAC customers.

WHATEVER YOUR BUILDINGS REQUIRE, WE HAVE THE CIRCULATION, VENTILATION AND HEATING SOLUTIONS THAT WORK.

A BRIEF HISTORY

Airmaster has a long and successful history in the electric fan business. We can trace our roots back to the invention of the first electric fan and the first ceiling fan motor, which was patented by Philip Diehl. Our company was incorporated in 1887 as Diehl & Company and is considered America's oldest continuously operating manufacturer of fan products.

We were later known as Diehl Division of Singer Manufacturing Company and as Airmaster Fan beginning in 1975. As our company grew, we acquired several fan manufacturers along with their product lines. In 2013, Airmaster was purchased by the Maico Group, a privately owned German company and global leader in ventilation products. As part of Maico, we have gained additional manufacturing capabilities, product innovation expertise and international marketing opportunities.

FANS & CIRCULATORS

Airmaster fans keep people, processes and plants cool. They're designed for comfort, health and safety. Our extensive selection of air circulators, spot coolers, Mancoolers® and air blasters can be matched to your application to keep your employees happy and productive.

AIR CIRCULATOR FANS

We offer a variety of air circulator fans for applications ranging from heavy-duty industrial to commercial. Products in this category range from Ultra-Quiet Fans, Safety Fans and Washdown Fans to Air Blasters, Workstation Fans and Ceiling Fans.

Heavy-Duty Fans

Our heavy-duty fans are our top-of-the-line air circulators featuring a proprietary fan blade that moves air further than competitive product blades. They are assembled in the USA and also come with a 10-year warranty. These products meet UL 507 specific safety certification and include the quietest fans that Airmaster offers. See our full line of heavy-duty fan styles and sizes. [Click or scan the QR Code to see our full line of heavy-duty fan styles and sizes.](#)

Airmaster offers a wide selection of "Best in Class" heavy-duty air circulators designed for use in all types of industries, as well as for specialized applications such as our Hazardous Location, High Ambient and Easy-Clean models.

Heavy-Duty Hazardous Location Fans

For use in areas that may contain explosive gas, vapor or dust in the atmosphere, including oil refineries, welding shops and paint operations. Explosion-proof motors for Class I, Group D & Class II, Groups E, F & G. [Click or scan the QR Code to see our line of heavy-duty hazardous location fans.](#)

Heavy-Duty High Ambient Fans

For use in environments with high temperatures. The motor will run up to 150 degrees before automatically shutting off. [Click or scan the QR Code to see our line of heavy-duty high ambient fans.](#)

Heavy-Duty Easy-Clean Fans

These fans include four hinge pins for easy and safe removal of the fan guard for cleaning and maintenance. [Click or scan the QR Code to see our line of heavy-duty easy-clean fans.](#)

Commercial Fans

Airmaster commercial fans are our most popular products and offer the best value for your money. These economical air movement solutions with OSHA-approved guards are designed for both industrial and commercial applications including gyms, warehouses, factories and shop floors. [Click or scan the QR Code to see our full line of commercial fan sizes and styles.](#)

Safety Fans

These fans meet OSHA safety standards and feature a “safety yellow” color for high visibility. The four hinge pins allow for safe, easy removal of the fan guard for cleaning and maintenance. Ideal for automotive, food processing and general factory operations. [Click or scan the QR Code to see our line of safety fan sizes and styles.](#)

Washdown Fans

Our washdown-duty air circulators are designed to withstand wet environments, as well as high-pressure cleaning with concentrated caustic solutions without affecting performance or function. Our stainless steel model comes in full stainless construction with a totally enclosed, non-vented motor. Our economical washdown model has powder-coated components with a washdown-rated motor. Both fans meet the USDA and NSF requirements for Food Zones. The motor washdown specification is IEC-IP55 and the features are BISSC-approved. 10-year or 3-year warranty. [Click or scan the QR Code to see our line of washdown fan sizes and styles.](#)

Specialty Fans

Airmaster also offers several fans designed for specialty uses, such as misting and spot cooling. [Click or scan the QR Code to see our selection of specialty fans.](#)

Light Commercial Fans

This is our low-priced, economical, entry-level fan. Non-Oscillating with three styles to choose from: Pedestal, Wall-Mount and Vertical-Mount. [Click or scan the QR Code to see our line of light commercial fans.](#)

BARREL FANS

Heavy-Duty Barrel Fans

Airmaster Heavy-Duty Barrel Fans include some of the most robust fans on the market. We offer a variety of options for diameter, number of propeller blades, airflow distance, horsepower and mobility. Our barrel fans meet UL 507-specific safety certification and come with a 2-year warranty. [Click or scan the QR Code to see our line of heavy-duty barrel fans.](#)

Commercial Barrel Fan

Our 4-in-1® Fan is our Commercial Barrel Fan. Just as the name says, it's four fans in one. You get three different mounting options — vertical, hanging and wall — plus a set of wheels to make it a portable barrel fan. For commercial and manufacturing environments. [Click or scan the QR Code to see our commercial barrel fan.](#)

DIRECT DRIVE AIR BLASTERS

Designed to move a lot of air, these “air cannon” fans feature an adjustable tilt drum on the high and medium models. Cast aluminum, non-sparking propellers. Choice of portable or stationary mount. Totally enclosed or explosion-proof motors. [Click or scan the QR Code to see our line of air blaster fan sizes and styles.](#)

WORKSTATION FANS

Our lightweight, portable air movement solution. Portable battery fan and plug-in models for single-person workstations. Yoke-Mount and Low Stand Pivot Fan styles available. [Click or scan the QR Code to see our line of workstation fan sizes and styles.](#)

CEILING FANS

The continuous-duty Mark 2 Ceiling Fan has the highest efficiency in its class. Non-reversible. DOE-compliant. [Click or scan the QR Code to see our line of ceiling fan sizes and styles.](#)

VENTILATION SOLUTIONS

Effective indoor air quality involves allowing your building to breathe properly. Airmaster ventilation solutions are designed to do just that. We offer three basic solutions: Wall, Roof and Specialty Ventilation.

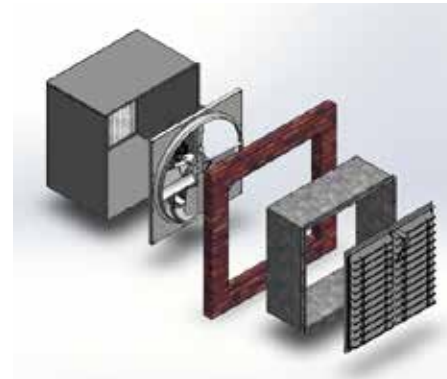

Our ventilation product offering is vast and customized for each individual business. We have experience in matching the right equipment for every type of building — from industrial facilities and factories to warehouses and machine shops. Our engineers will work with you to determine the optimum solution for your building's ventilation needs.

WALL VENTILATION

Our wall ventilation solutions include products such as exhaust fans, wall collars, shutters, intake louvers and weather hoods. An Airmaster engineer will help you determine the best options for your building. [Click or scan the QR Code to see our wall ventilation solutions.](#)

ROOF VENTILATION

Airmaster roof ventilation solutions include gravity relief vents, intake louvers, weather hoods, propeller rooftop ventilators and exhaust fans. We will guide you in selecting the right roof ventilation solution for your space. [Click or scan the QR Code to see our roof ventilation solutions.](#)

SPECIALTY VENTILATION

Our specialty ventilation solutions range from tube axial products to in-line duct fans. We'll show you the right custom solution for your work areas. [Click or scan the QR Code to see our specialty ventilation solutions.](#)

Make sure and check out our [Ventilation Selection Guide](#) which will help assist you in selecting the proper type and size fan

HEATING PRODUCTS

Airmaster provides a wide range of electric heaters that are ideal for offices, retail locations or wherever additional heat is required. Choose from our portable ceramic and milkhouse heaters to our forced wall and salamander heaters.

The selection includes both portable and fixed-position heaters, with models for personal/workstation spaces and larger areas. Available in different voltage options. We have the products you need to keep your employees and customers warm. [Click or scan the QR Code to see our line of heating products.](#)

www.airmasterfan.com/heating

PORTABLE CERAMIC HEATER

Our most popular and versatile personal heater.

MILKHOUSE HEATER

Easy-to-use personal heater with overheat and tip-over shut-off controls.

FORCED WALL HEATER

Permanent heater. Perfect for heating a small space.

ELECTRIC SALAMANDER HEATER

A portable heater designed to warm larger spaces where fuels cannot be used.
