

Why UL 507?

- ❖ *Certifying Electric Fan Safety since 1935*
- ❖ *Industry Standard in Safety Certifications*
- ❖ *Certifies construction is built for accessibility and maintainability*
- ❖ *Confirms all components used with the product conform to UL Safety Standards; **No Shortcuts Taken!***
- ❖ *Locked Rotor Test to confirm equipment contains adequate preventative safety measures.*
- ❖ *Tested under operation at various voltages to confirm motor and propeller operation.*
- ❖ *Temperature testing of motor under all potential methods of operation to protect longevity of the equipment*
- ❖ *Stability test, to protect from tipping over when operated on an incline in any intended manner*
- ❖ *Confirms free standing units can withstand 20 lbs of force when extended over 6.9ft in any mode of operation*
