

High Efficiency Portable Battery Fan

Product Features:

- High efficiency, low power consumption
- Variable speed, direct drive, brushless DC Motor
- Epoxy coated rolled steel housing
- Epoxy coated front and rear guards with secondary plastic outer guards
- Build-in Battery pack - Battery life: 5 hr run time on high speed, 10 hr run time on low speed.
- 360° tilt angle
- Cordless
- Mistring ring option

Getting air movement to an area where power is not available can be a challenge. Airmaster offers a portable, battery powered fan that can go where you need it and run for up to 10 hours. The rechargeable on-board battery pack will charge in 30 minutes when plugged into a power outlet, then you can take this light weight fan anywhere. At only ten pounds, the rolled steel drum style fan housing has a carry handle on top and aluminum stand that can be tilted to move air where you need it. Optional misting ring is available when additional cooling is needed.
